**M42K**

# M42K

SINCE 1974

- 42M working height
- Volvo FM380 chassis
- 4x2-5600mm wheelbase
- Fully automatic 5-section ladder
- Rescue cage capacity: 450kg / 5-person
- Articulated ladder section up to 85°

85°

The articulated ladder section operates up to 85°, providing advanced rescue capability in harsh conditions, behind high obstacles, on narrow streets, and from below ground level.

22 m  
max. outreach

42 m  
max. working height

M42K provides up to 42 m working height, offering safe and effective access for firefighting and rescue operations at high-rise buildings and difficult locations.

The rescue cage provides enough space for 5 persons at all working angles. Its robust, lightweight, and compact structure offers 450 kg capacity and stretcher compatibility.
